The Smart Beginners Guide to Vegan Soapmaking Susan Henny 2013-11 I Think The Babylonians Were Onto Something.... This craft was first mastered by the Babylonians way back in 2800 B.C. Experts discovered this during an excavation process many years ago. Although the ancient Babylonians may not have had the same tools at their disposal as us, their methods of soap making were not actually that different to the ones that we use today. What's In A Bar Of Soap? Soap can be found in every house in the country. We all use it, but very few of us actually take the time to think about the ingredients contained in a bar of soap. Worryingly, there are many problems with the standard bars of soap that you can buy in any supermarket. Most of them contain ingredients that can actually be harmful to the skin. This is why we find that so many people are very interested in learning how to make their own soap. Vegan soap is slowly gaining popularity, and there are many reasons for this. First of all, there is the fact that there are absolutely no additives to be found in homemade vegan soap that can be harmful to the skin. Who Says That There's No Short-cuts to Soap & Glory?
