Medieval London Caroline Barron 2017-11-30 Caroline M. Barron is the world's leading authority on the history of medieval London. For half a century she has investigated London's role as medieval England's political, cultural, and commercial capital, together with the urban landscape and the social, occupational, and religious cultures that shaped the lives of its inhabitants. This collection of eighteen papers focuses on four themes: crown and city; parish, church, and religious culture; the people of medieval London; and the city's intellectual and cultural world. They represent essential reading on the history of one of the world's greatest cities by its foremost scholar.

Londinopolis, C.1500 - C.1750 Mark S.R. Jenner 2000 Events such as the Fire of London and the Plague, and historic locations like the Globe Theatre, are part of London's heritage. Yet until recently, the history of the city between 1500 and 1750 has been little studied. During this period, London's population soared from around 50,000 to nearly half a million--the demographic explosion transformed the city to a metropolis. London became a center of new social and sexual identities and a solvent of older, more hierarchical forms of social organization. The essays in this volume cover the themes of polis and the police, gender and sexuality, space and place, and material culture and consumption. Within these themes are thieves, prostitutes, litigious wives, the poor, disease, "great quantities of gooseberry pye," and the taxing question of fresh water.

Household Accounts and Disbursement Books of Robert Dudley, Earl of Leicester: Volume 6 Robert Dudley 1995 Robert Dudley, the first Earl of Leicester, was a leading figure at the court of Elizabeth I, and this book presents a scholarly edition of both his two surviving household accounts (from 1558 to 1581), and the fragments of his disbursement books (from 1584 to 1586). The work also includes an appendix of those lists of household servants that have survived. This is the only collection of such information available for such a prominent member of the Elizabethan court, and as such provides numerous valuable insights into the personal finances of members of the Elizabethan aristocracy. It will thus be essential reading for any serious scholar of the high politics of the Elizabethan period.

A History of Corporate Financial Reporting in Britain John Richard Edwards 2018-07-11 A History of Corporate Financial Reporting provides an understanding of the procedures and practices which constitute corporate financial reporting in Britain, at different points of time, and how and why those practices changed and became what they are now. Its particular focus is the external financial reporting practices of joint stock companies. This is worth knowing about given the widely held view that Britain (i) pioneered modern financial reporting, and (ii) played a primary role in the development of both capital markets and professional accountancy. The book makes use of a principal and agent framework to study accounting's past, but one where the failure of managers always to supply the information that users' desire is given full recognition. It is shown that corporate financial reporting did not develop into its current state in a straightforward and orderly fashion. Each era produces different environmental conditions and imposes new demands on accounting. A proper understanding of accounting developments therefore requires a careful examination of the interrelationship between accountants and accounting techniques on the one hand and, on the other, the social and economic context within which changes took place. The book's corporate coverage starts with the legendary East India Company, created in 1600, and continues through the heyday of the statutory trading companies founded to build Britain's canals (commencing in the 1770s) and railways (commencing c.1829) to focus, principally, on the limited liability company fashioned by the Joint Stock Companies Act 1844 and the Limited Liability Act 1855. The story terminates in 2005 when listed companies were required to prepare their consolidated accounts in accordance with International Financial Reporting Standards, thus signalling the effective end of British accounting.
