Design, Operation and Training Manual for an Intensive Culture Shrimp Hatchery

Granvil Dean Treece 1999-06-01 Covers two species *Penaeus monodon* and *Penaeus vannamei*. It is organized into three main parts (Design, Operation, and Training). The design part focuses on two hatcheries and gives detailed plans of their construction as well as other options. The operation portion of the manual details the procedures for most efficient operation of a specific hatchery. This manual consists of compiled, presently known information important for training new personnel. Contains enough detail to provide the newcomer with knowledge to run a hatchery and provides details to assist the experienced hatchery manager. Illustrated.

Phytoremediation David Tsao 2003-02-12 "This [volume] provides a general overview of phytotechnologies. Authors from private industry, academia, the consulting community and regulatory agencies have all contributed to [it]. Starting with the basic processes and mechanisms occurring in the soil-plant-atmosphere continuum, the typical applications of vegetation for cleaning up and remediating contaminated sites are described. Since the growth of vegetation is paramount to this technology, the factors within the subsurface environment affecting growth are discussed in detail as well. These include the processes and factors in the soil environment that affect the plant and the subsurface microbial community. After these two "introductory" chapters, the most prevalent applications of phytotechnologies are reviewed. These include vegetated systems for treating organic and inorganic contaminants in solid media, hydraulic systems for controlling and treating contaminant groundwater plumes, and vegetative covers for surface water protection and landfill leachate management. Finally, this monograph concludes with a discussion of the regulatory implications of applying this technology towards the clean up and remediation of contaminated sites worldwide."-Pages ix-x

Nuclear Science Abstracts 1971 NSA is a comprehensive collection of international

nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.

Dictionary of Architecture and Building Construction Nikolas Davies 2008 With more than 20,000 words and terms individually defined, the Dictionary offers huge coverage for anyone studying or working in architecture, construction or any of the built environment fields. The innovative and detailed cross-referencing system allows readers to track down elusive definitions from general subject headings. Starting from only the vaguest idea of the word required, a reader can quickly track down precisely the term they are looking for. The book is illustrated with stunning drawings that provide a visual as well as a textual definition of both key concepts and subtle differences in meaning. Davies and Jokiniemi's work sets a new standard for reference books for all those interested in the buildings that surround us. It has comprehensive coverage of architecture and building terms. It has a detailed and innovative cross-referencing system. It is beautifully illustrated with detailed technical drawings.
