Cheerful Sacrifice Jonathan Nicholls 2009-04-21 Cheerful Sacrifice tells the story of the spring offensive of April–May 1917, otherwise known as the Battle of Arras. Probably because the noise had hardly died down before it started up again with the explosions at Messines, shortly to be followed by the even more horrible Third Ypres—remembered as Passchendaele—the Battle of Arras has not received the attention it deserves. Yet, as the author points out, on the basis of the daily casualty rate it was the most lethal and costly British offensive battle of the First World War. In the thirty-nine days that the battle lasted the average casualty rate was far higher than at either the Somme or Passchendaele. Jonathan Nicholls, in this his first book, gives the Battle of Arras its proper place in the annals of military history, enhancing his text with a wealth of eye-witness accounts. One is left in no doubt that the survivor who described it as 'the most savage infantry battle of the war', did not exaggerate. Nor can there be much doubt that the author is destined to rise high in the firmament of military historians.

Internal Combustion Engines Institution of Mechanical Engineers 2014-10-10 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Original Austin-Healey 100, 100-Six and 3000 Anders Clausager 2002 The essential and beautifully photographed guide to the quintessential British sports car features all-color photography of restored and original examples and detail close-up shots ideal for do-it-yourselfers.

The Cornell Alumni News 1916

Jeb Stuart John William Thomason 1994-06-01 Hardly any biography could contain the robust and romantic Jeb Stuart, but John W. Thomason Jr. goes as far as anyone ever has in pinning down the quality of the Confederate cavalry commander. Virginia-bred, James Ewell Brown Stuart graduated from West Point, where he was called 'Beauty,' and rode with the Mounted Rifles against the Apaches and Comanches on the western frontier. When Virginia seceded from the Union, Jeb Stuart joined the Confederate army. His lightning-like raids became legendary. From Bull Run to Brandy Station he served as Robert E. Lee's eyes and ears, becoming a major general at the age of twenty-eight. Less than three years later Stuart's meteoric career ended with his death in a cavalry charge.

Global Waste Management Outlook United Nations Publications 2017-03-31 The UNEP Governing Council of February 2013 requested the United Nations Environment Programme "to develop a global outlook of challenges, trends and policies in relation to waste prevention, minimization and management, taking into account the materials life cycle, subject to the availability of extra-budgetary resources and in consultation with Governments and stakeholders, building on available data, best practices and success stories, taking into account the Global Chemicals Outlook and any other relevant initiatives and taking care not to duplicate existing information, to provide guidance for national policy planning." UNEP's International Environmental Technology Centre (IETC), in collaboration with the International Solid Waste Association (ISWA), has taken the lead on this initiative; aiming to develop the Global Waste Management Outlook as a tool to provide an authoritative overview, analysis and recommendations for action of policy instruments and financing models for waste management. The GWMO is the result of two year's work and provides the first comprehensive global overview of the state of waste management around the world in the 21st century.

Adventures in Research Edwin Phelps Hartman 1970

The War Diaries of Weary Dunlop Edward E Dunlop 2005-03-01 This extraordinary first-hand account of Sir Edward 'Weary' Dunlop's experiences as senior medical officer in the infamous prisoner-of-war

camps in Java and on the Burma-Thailand Railway, is not only an account of great historical significance but also a testament to the ability of the human spirit to overcome the most unbearably cruel conditions. 'I have the testimony of hundreds of Australians who had served with me and who accompanied Weary to Burma and Siam that he was both their inspiration and the main instrument of their physical and spiritual survival.' Laurens Van Der Post 'His experiences - and the manner in which he handled them - are what have made Weary Dunlop one of our most loved and most respected countrymen.' Herald Sun 'Sir Edward's care and concern for his men and his unbreakable spirit made him a living legend.' Sunday Times

Prisoners of War Patsy Adam-Smith 1997 The traditional image of a prisoner of war is that of an emaciated, diseased and ill-treated figure humiliated by incarceration. Prisoners of War challenges this image. Using dozens of interviews with former POWs, Patsy Adam-Smith shows the strength and courage of Australians taken prisoner in World War I, World War II and the Korean War. Says Patsy: 'This book has not been written for ex-prisoners: they know the homesickness of exile, the tyranny of bondage; it was written for those people of today who know little of the experiences of these men and women, of their courage, endurance and pain. It has been written for the generations to come.'

Abraham Zabludovsky Architect 1979 - 1993 Abraham Zabludovsky 1996-01-01 A detailed catalog of the work of the renowned Mexican architect.

In the Footsteps of the Red Baron Mike O'Connor 2005-02-19 Manfred von Richthofen became a fighter pilot on the Western Front in August 1916. By January 1917, Richthofen had shot down fifteen aircraft had been appointed commander of his own unit. He painted the fuselage of his Albatros D-III a bright red and was nicknamed the Red Baron. In June 1917, Richthofen was appointed commander of the German Flying Circus. Made up of Germany's top fighter pilots, this new unit was highly mobile and could be quickly sent to any part of the Western Front where it was most needed. Richthofen and his pilots achieved immediate success during the air war over Ypres during August and September. Manfred von Richthofen was killed on 21st April 1918. Richthofen had destroyed 80 allied aircraft, the highest score of any fighter pilot during the First World War. This book is divided into three sectors of the WWI front line in which von Richthofen operated. Each area is conveniently reached within hours. Airfield sites, memorials and the graves of Manfred's famous victims are described and directions for the battlefield walker are included with information on related museums and historic sites with special association with this most famous of fighter pilots.

Early Oriental History John Eadie 2018-11-10

Tiger Men Barry Petersen 1994 In 1963 Barry Peterson left Australia for Vietnam to train local tribes to defend their villages against the Vietcong. This is the story of those Truong Son, or "Tiger Men," who became the most respected and feared native forces in South Vietnam. But it is also the sad story of the defeat and destruction of the Montagnard culture and way of life, as Vietnamese and American leadership ultimately turned its back on its loyal supporters.

A Chain of Thunder Jeff Shaara 2014 Presents a first installment in a trilogy inspired by the Siege of Vicksburg that follows Ulysses S. Grant's successful crossing of the Mississippi in May 1863 and his reluctant

decision to surround Confederate soldiers and citizens in a ring of Federal entrenchments to starve them into surrendering.
