Eyes Wide Shut Robert P. Kolker

2019-06-05 Twenty years since its release, Stanley Kubrick's *Eyes Wide Shut* remains a complex, visually arresting film about domesticity, sexual disturbance, and dreams. It was on the director's mind for some 50 years before he finally put it into production. Using the Stanley Kubrick Archive at the University of the Arts, London, and interviews with participants in the production, the authors create an archeology of the film that traces the progress of the film from its origins to its completion, reception, and afterlife. The book is also an appreciation of this enigmatic work and its equally enigmatic creator.

Stanley Kubrick David Mikics 2020-08-18
An engrossing biography of one of the most

influential filmmakers in cinematic history Kubrick grew up in the Bronx, a doctor's son. From a young age he was consumed by photography, chess, and, above all else, movies. He was a self-taught filmmaker and self-proclaimed outsider, and his films exist in a unique world of their own outside the Hollywood mainstream. Kubrick's Jewishness played a crucial role in his idea of himself as an outsider. Obsessed with rebellion against authority, war, and male violence, Kubrick was himself a calm, coolly masterful creator and a talkative, ever-curious polymath immersed in friends and family. Drawing on interviews and new archival material, Mikics for the first time explores the personal side of Kubrick's films.

The Making of 2001: A Space Odyssey
Stephanie Schwam 2010-07-21 "If 2001 has stirred your emotions, your subconscious, your mythological yearnings, then it has

succeeded."--Stanley Kubrick Stanley Kubrick's extraordinary movie 2001: A Space Odyssey was released in 1969. The critics initially disliked it, but the public loved it. And eventually, the film took its rightful place as one of the most innovative, brilliant, and pivotal works of modern cinema. The Making of 2001: A Space Odyssey consists of testimony from Kubrick's collaborators and commentary from critics and historians. This is the most complete book on the film to date--from Stanley Kubrick's first meeting with screenwriter Arthur C. Clarke to Kubrick's exhaustive research to the actual shooting and release of the movie.

Some Like It Hot Billy Wilder 2005 The complete guide to Billy Wilder's

masterpiece! Find out everything you could ever want to know (and more) about the movie voted best comedy of the century by the American Film Institute. A daring tale of crossdressing from a time when the subject was all but taboo, *Some Like it Hot* (1959) tells the story of two jazz musicians who are forced to go undercover in an all-girls? band to escape from the mob. With an ingenious screenplay by I.A.L. Diamond and Billy Wilder, and flawless performances by Tony Curtis, Jack Lemmon and the famously difficult Marilyn Monroe, *Some Like it Hot* is the embodiment of comic perfection. Includes: Interviews with Billy Wilder, Tony Curtis, Jack Lemmon, and others Complete facsimile of the screenplay with film stills from every scene Excerpts from the script's first draft Behind-the-scenes photos Original promotional materials from all around the world Annotated/illustrated Billy Wilder filmography The editor: Alison

Castle studied philosophy as an undergraduate (Columbia University) and went on to receive her graduate degree in photography and film (New York University/International Center of Photography masters program). She lives in Paris, home of the world's best cinemas. The interviewer: Dan Auiler is the author of *Hitchcock's Notebooks* (HarperCollins/Bloomsbury) and *Vertigo: The Making of a Hitchcock Classic* (St. Martin's Press). His books on Martin Scorsese's *Taxi Driver* and *Goodfellas* (Putnam/Bloomsbury) were published in 2002. He lives in Long Beach, California. *Stanley Kubrick* Stanley Kubrick 2001 From his first feature film, *Fear and Desire* (1953), to his final, posthumously released *Eyes Wide Shut* (1999), Stanley Kubrick excelled at probing the dark corners of human consciousness. In doing so, he adapted such popular novels as *The Killing*,

Lolita, A Clockwork Orange, and The Shining and selected a wide variety of genres for his films -- black comedy (Dr. Strangelove), science fiction (2001: A Space Odyssey), and war (Paths of Glory and Full Metal Jacket). Because he was peerless in unveiling the intimate mysteries of human nature, no new film by Kubrick ever failed to spark debate or to be deeply pondered. Kubrick (1928-1999) has remained as elusive as the subjects of his films. Unlike many other filmmakers he was not inclined to grant interviews, instead preferring to let his movies speak for themselves. By allowing both critics and moviegoers to see the inner workings of this reclusive filmmaker, this first comprehensive collection of his relatively few interviews is invaluable. Ranging from 1959 to 1987 and including Kubrick's conversations with Gene Siskel, Jeremy Bernstein, Gene D. Phillips, and others, this book reveals

Kubrick's diverse interests -- nuclear energy and its consequences, space exploration, science fiction, literature, religion, psychoanalysis, the effects of violence, and even chess -- and discloses how each affects his films. He enthusiastically speaks of how advances in camera and sound technology made his films more effective. Kubrick details his hands-on approach to filmmaking as he discusses why he supervises nearly every aspect of production. "All the hand-held camerawork is mine," he says in a 1972 interview about A Clockwork Orange. "In addition to the fun of doing the shooting myself, I find it virtually impossible to explain what I want in a hand-held shot to even the most talented and sensitive camera operator." Neither guarded nor evasive, the Kubrick who emerges from these interviews is candid, opinionated, confident, and articulate. His incredible

memory and his gift for organization come to light as he quotes verbatim sections of reviews, books, and articles. Despite his reputation as a recluse, the Kubrick of these interviews is approachable, witty, full of anecdotes, and eager to share a fascinating story. Gene D. Phillips, S.J., is a professor of English at Loyola University in Chicago, where he teaches fiction and the history of film. He is the author of many notable books on film and is a founding member of the editorial board of both *Literature/Film Quarterly* and *The Tennessee Williams Journal*. He was acquainted with Stanley Kubrick for twenty-five years.

On Kubrick James Naremore 2019-07-25 On Kubrick provides an illuminating critical account of the films of Stanley Kubrick, from his earliest feature, *Fear and Desire* (1953), to the posthumously-produced *A.I. Artificial Intelligence* (Steven Spielberg,

2001). The book offers provocative analysis of each of Kubrick's films, together with new information about their production histories and cultural contexts. Its ultimate aim is to provide a concise yet thorough discussion that will be useful as both an academic text and a trade publication. James Naremore argues that in several respects Kubrick was one of the cinema's last modernists: his taste and sensibility were shaped by the artistic culture of New York in the 1950s; he became a celebrated auteur who forged a distinctive style; he used art-cinema conventions in commercial productions; he challenged censorship regulations; and throughout his career he was preoccupied with one of the central themes of modernist art - the conflict between rationality and its ever-present shadow, the unconscious. War and science are key concerns in Kubrick's oeuvre, and his work has a hyper-masculine quality. Yet

no director has more relentlessly emphasized the absurdity of combat, as in *Paths of Glory* (1957) and *Full Metal Jacket* (1987), the failure of scientific reasoning, as in *2001* (1968), and the fascistic impulses in masculine sexuality, as in *Dr Strangelove* (1964) and *Eyes Wide Shut* (1999). The book also argues that while Kubrick was a voracious intellectual and a life-long autodidact, the fascination of his work has less to do with the ideas it espouses than with the emotions it evokes. Often described as 'cool' or 'cold,' Kubrick is best understood as a skillful practitioner of what might be called the aesthetics of the grotesque; he employs extreme forms of caricature and black comedy to create disgusting, frightening yet also laughable images of the human body, creating a sense of unease that leaves viewers unsure of how to react.

Stanley Kubrick Nathan Abrams 2018-04-19 Stanley Kubrick is generally acknowledged as one of the world's great directors. Yet few critics or scholars have considered how he emerged from a unique and vibrant cultural milieu: the New York Jewish intelligentsia. Stanley Kubrick reexamines the director's work in context of his ethnic and cultural origins. Focusing on several of Kubrick's key themes—including masculinity, ethical responsibility, and the nature of evil—it demonstrates how his films were in conversation with contemporary New York Jewish intellectuals who grappled with the same concerns. At the same time, it explores

Kubrick's fraught relationship with his Jewish identity and his reluctance to be pegged as an ethnic director, manifest in his removal of Jewish references and characters from stories he adapted. As he digs deep into rare Kubrick archives to reveal insights about the director's life and times, film scholar Nathan Abrams also provides a nuanced account of Kubrick's cinematic artistry. Each chapter offers a detailed analysis of one of Kubrick's major films, including *Lolita*, *Dr. Strangelove*, *2001, A Clockwork Orange*, *Barry Lyndon*, *The Shining*, *Full Metal Jacket*, and *Eyes Wide Shut*. Stanley Kubrick thus presents an illuminating look at one of the twentieth century's most renowned and yet misunderstood directors.

Space Odyssey Michael Benson 2019-04-23
The definitive story of the making of 2001: A Space Odyssey, acclaimed today as one of the greatest films ever made, and of director Stanley Kubrick and writer Arthur C. Clarke—"a tremendous explication of a tremendous film....Breathtaking" (The Washington Post). Fifty years ago a strikingly original film had its premiere. Still acclaimed as one of the most remarkable and important motion pictures ever made, 2001: A Space Odyssey depicted the first contacts between humanity and extraterrestrial intelligence. The movie was the product of a singular collaboration between Stanley Kubrick and science fiction visionary Arthur C. Clarke. Fresh off

the success of his cold war satire *Dr. Strangelove*, Kubrick wanted to make the first truly first-rate science fiction film. Drawing from Clarke's ideas and with one of the author's short stories as the initial inspiration, their bold vision benefited from pioneering special effects that still look extraordinary today, even in an age of computer-generated images. In *Space Odyssey*, author, artist, and award-winning filmmaker Michael Benson "delivers expert inside stuff" (San Francisco Chronicle) from his extensive research of Kubrick's and Clarke's archives. He has had the cooperation of Kubrick's widow, Christiane, and interviewed most of the key people still alive who worked on the film. Drawing also from other previously unpublished interviews, *Space Odyssey* provides a 360-degree view of the film from its genesis to its legacy, including many previously untold stories. And it features dozens of photos

from the making of the film, most never previously published. "At last! The dense, intense, detailed, and authoritative saga of the making of the greatest motion picture I've ever seen...Michael Benson has done the *Cosmos* a great service" (Academy Award-winning actor Tom Hanks).

Losing the Light Andrew Yule 2000-04-01
Mix one American director with a German producer on a period extravaganza set the locations in Italy and Spain and start the cameras rolling without enough money to do the job. Then sit back and watch disaster strike. That is the scenario Andrew Yule has *Stanley Kubrick* Tatjana Ljujić 2015 *Stanley Kubrick: New Perspectives* brings together essays by scholars who have examined the traces that Kubrick's work has left in archives, in particular his own collection of film-related materials, which was donated to the University of the Arts London in 2007. Richly illustrated with film stills and

previously unseen material from the Stanley Kubrick Archive, this book is designed to open the reader's eyes to the wonder and richness of Kubrick's oeuvre. The collection held by the University is made up of a range of material including props, scripts, research, production paperwork such as call sheets, costumes and photographs for all his films and Look, as well as material for those projects that were conceived but never visualised. By maintaining a high degree of control in the film making process, Kubrick was able to retain material generated by his pioneering techniques, research and production work: arguably making this collection one of the most complete examples of film making practice world wide. Kubrick's films have inspired a huge amount of critical commentary, yet until recently critics and scholars have made little use of archival resources. The essays included in this

collection offer new perspectives on Kubrick's working methods, the manifold influences on his films, their themes and style as well as their marketing and reception. Between them, the essays cover the totality of Kubrick's career, from his beginnings as a photojournalist and documentary filmmaker in the late 1940s and early 1950s to his last movie, *Eyes Wide Shut*, which was released a few months after his death in 1999. Ranging from low-budget noir thrillers to spectacular historical and futuristic epics, from war films to erotic dramas, from horror to topical movies, Kubrick's work explores fundamental questions about sexuality and violence, military organisations and combat, male bonding and marriage, human nature and social change. In doing so, he has produced iconic images (and sounds) representing key events and developments of the 20th

century, including World War I, the threat of nuclear apocalypse, the space race, the Vietnam War, the rise of juvenile delinquency and family breakdown.

Cinema of Stanley Kubrick Norman Kagan 2000-02-29 Stanley Kubrick is one of our most brilliant, innovative and difficult filmmakers. Norman Kagan's analysis cuts a lucid path through those difficulties. He summarizes the plots of each of Kubrick's films, providing a running commentary as he goes along. He moreover lists thematic obsessions that run through all the films he describes, offering an intriguing sense of Kubrick's career as a whole.

Stanley Kubrick Vincent Lobrutto 1999-05-07 Stanley Kubrick, director of the acclaimed films *Path of Glory*, *Spartacus*, *Lolita*, *Dr. Strangelove*, *2001: Space Odyssey*, *A Clockwork Orange*, *The Shining*, and *Full Metal Jacket*, is arguably one of the greatest American filmmakers. Yet,

despite being hailed as “a giant” by Orson Welles, little is known about the reclusive director. Stanley Kubrick—the first full-length study of his life—is based on assiduous archival research as well as new interviews with friends, family, and colleagues. Film scholar Vincent LoBRutto provides a comprehensive portrait of the director, from his high school days, in the Bronx and his stint as a photographer for *Look* magazine, through the creation of his wide-ranging movies, including the long-awaited *Eyes Wide Shut*. The author provides behind-the-scenes details about writing, filming, financing, and reception of the director's entire output, paying close attention to the technical innovations and to his often contentious relationships with actors. This fascinating biography exposes the enigma that is Stanley Kubrick while placing him in context of film history.

The Art of the Hollywood Backdrop

Karen L. Maness 2016-11-01 The definitive behind-the-scenes history of one of Hollywood's most closely guarded cinematic secrets finally revealed—painted backdrops and the scenic artists who brought them to the big screen. In almost every feature film of Hollywood's golden age, from *The Wizard of Oz* to *North by Northwest* to *Cleopatra* to *The Sound of Music*, painted backings have convinced moviegoers that what they are seeing—whether the fantastic roads of Oz, the presidents of Mount Rushmore, or ancient Egyptian kingdoms—is absolutely real. These backings are at once intended to transport the audience and yet remain unseen for what they really are. *The Art of the Hollywood Backdrop* reveals the hidden world and creators of these masterpieces, long-guarded as a special effects secret by the major studios such as MGM, Warner Brothers, Universal, Columbia, 20th

Century Fox, and Paramount. Despite the continued use of hand-painted backings in today's films, including the big-budget *Interstellar* and Lemony Snicket's *A Series of Unfortunate Events* among many others, digital technology is beginning to supplant the art form. In an effort to preserve the irreplaceable knowledge of scenic masters, Karen Maness and Richard Isackes, in collaboration with the Art Directors Guild, have compiled a definitive history of the craft, complete with interviews of the surviving artists. This is a rich undiscovered history—a history replete with competing art departments, dynastic scenic families, and origins stretching back to the films of Méliès, Edison, Sennett, Chaplin, and Fairbanks. Filled cover to cover with over 300 images, *The Art of the Hollywood Backdrop* is beautifully packaged as a hardcover book with slipcase.

Stanley Kubrick Produces James Fenwick
2020-12-18 Stanley Kubrick Produces

provides the first comprehensive account of Stanley Kubrick's role as a producer, and of the role of the producers he worked with throughout his career. It considers how he first emerged as a producer, how he developed the role, and how he ultimately used it to fashion himself a powerbase by the 1970s. It goes on to consider how Kubrick's centralizing of power became a self-defeating strategy by the 1980s and 1990s, one that led him to struggle to move projects out of development and into active production. Making use of overlooked archival sources and uncovering newly discovered 'lost' Kubrick projects (The Cop Killer, Shark Safari, and The Perfect Marriage among them), as well as providing the first detailed overview of the World Assembly of Youth film, James Fenwick provides a comprehensive account of Kubrick's life and career and of how he managed to obtain the level of control that

he possessed by the 1970s. Along the way, the book traces the rapid changes taking place in the American film industry in the post-studio era, uncovering new perspectives about the rise of young independent producers, the operations of influential companies such as Seven Arts and United Artists, and the whole field of film marketing.

Stanley Kubrick Randy Rasmussen 2015-11-16 Stanley Kubrick had a great talent for creating memorable images—such as his famous jump cut from a bone tossed into the prehistoric sky to a spaceship orbiting the earth in 2001. Like

the composer of a great symphony, Kubrick also had the ability to draw his memorable moments into a lyrical whole. Balancing harmony with discord, he kept viewers on edge by constantly shifting relationships among the dramatic elements in his movies. The results often confounded expectations and provoked controversy, right up through *Eyes Wide Shut*, the last film of his life. This book is an intensive, scene-by-scene analysis of Kubrick's most mature work—seven meticulously wrought films,

from *Dr. Strangelove* to *Eyes Wide Shut*. In these films, Kubrick dramatized the complexity and mutability of the human struggle, in settings so diverse that some critics have failed to see the common threads. Rasmussen traces those threads and reveals the always shifting, always memorable, always passionately rendered pattern. Instructors considering this book for use in a course may request an examination copy here.
